Mac Os Boot Cd Rom New Hard Drive

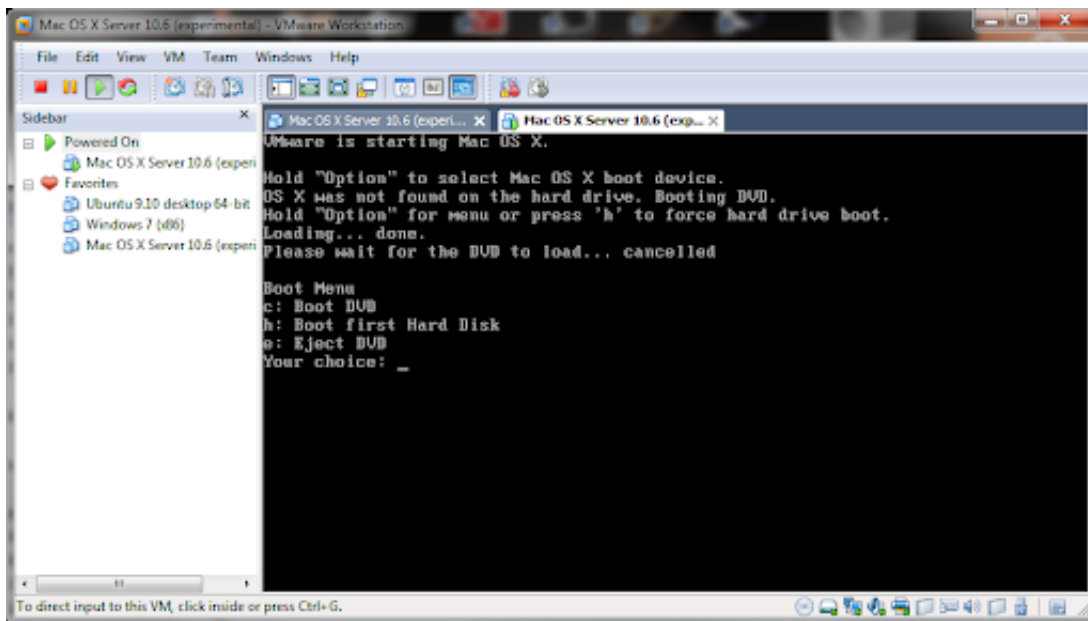

Mac Os Boot Cd Rom New Hard Drive

You can then follow the steps in this article to start up from it. By default, your Mac starts up from its built-in hard disk, but a startup disk can be any storage device that contains an operating system compatible with your Mac.. For example, if you install macOS on an internal or external drive, your Mac can recognise that drive as a startup disk.

1. boot hard drive
